**DETAILED ACTION**

***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-21, drawn to a method of making a coated substrate.

Group II, claim(s) 22-26, drawn to a method of electrowinning metal using a coated anode.

Group III, claim(s) 27, drawn to a method of electrowinning metal using a coated cover.

Group IV, claim(s) 28 and 29, drawn to a coated substrate for use in a metal electrowinning cell.

2. The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the only corresponding feature amongst the groups is a hematite coating on a substrate. However, as indicated on the PCT search report, such feature was known in the prior art by at least WO 00/11243 and US 2001/0020590. Therefore, this feature cannot be a special technical feature because it does not provide a contribution over the prior art.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does

not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
